

HireVue Coordinate Streamlines Job Fair and Campus Recruiting with Scalable, Self-Service Event Scheduling

New scheduling features accelerate hiring by allowing recruiters to focus on candidates instead of calendars

SALT LAKE CITY - March 19, 2018 - [HireVue](#), the leading provider of AI-driven video intelligence solutions that bring the best talent to top global companies faster, announced a new hiring event scheduling module in its HireVue Coordinate solution. Now corporate recruiting teams can offer seamless, self-service scheduling for hiring events, from campus recruiting to job fairs.

"From day one, HireVue set out to connect companies with better talent and to do so faster and more effectively. With the new events functionality for HireVue Coordinate, busy recruiting teams can match the pace of today's top candidates by focusing on the candidate, instead of the calendar and scheduling challenges, at crowded and competitive recruiting events," said Loren Larsen, Chief Technology Officer at HireVue. "Companies are already taking advantage of HireVue Coordinate's capabilities for scheduling and managing one-to-one interviews for each job opening. Now recruiters can work faster and smarter at large-scale job fairs and campus recruiting events, giving them better odds of hiring the best of the market's top new talent."

By seamlessly integrating the calendars of recruiters, hiring managers and conference rooms, candidates can self-schedule and even reschedule their interviews based on real-time availability of all recruiters. The new event functionality allows users to schedule and easily manage several candidates into specific time slots for larger groups of candidates such as those attending hiring events and career fairs. The seamless solution also creates a consistent candidate experience with branded and automated email communications and interview guides for every position.

HireVue Coordinate product features include:

- Effortless candidate self-scheduling and rescheduling capabilities
- Automated complex interview lineups
- Hiring event coordination and scheduling
- Assessment center coordination
- Embedded interview questions & guides

About HireVue

Across the globe, HireVue is transforming the way companies discover, hire and develop the best talent with its Video Intelligence platform. Combining predictive, validated industrial/organizational science with artificial intelligence for decision support during the hiring

process, recruiting experts are delivering higher quality talent, faster.
